

BUCKS & BIRDS

European Mounts

The outdoors is my life; I have always been an avid hunter and fishermen. I relocated from Missouri to the Nebraska Pan handle four years ago and harvested my first mule deer. Local taxidermist are few and far between and costly. I started to experiment with doing my own European mounts and Turkey fans. I think I tried everything on the market in the way of "do it yourself kits". One thing led to another and I started doing other people's mounts along with my own. Now I do the work on the side, paying close attention to detail for a professional finished product.

Jeff Hartwig
